PlanoFlex Flexible expansion joint

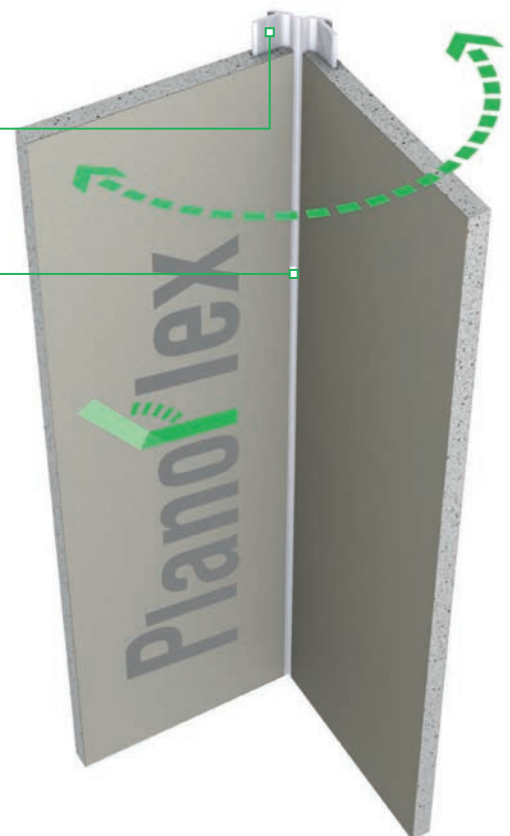

BRINGING MOVEMENT TO DRY CONSTRUCTION

The clever flexible
expansion joint
for walls and ceilings

Integrated:
Expansion joint

Angle:
Flexibly adjustable
from 1 – 180°

Flexible expansion

The perfect properties

FOR MAXIMUM FLEXIBILITY AND STABILITY

- ▶ Flexibly adjustable to angles of 1 – 180°
- ▶ Prefabricated using drywall panels made from gypsum fibreboard, cement, etc.
- ▶ Drywall panels measuring 12.5 – 25 mm in thickness
- ▶ Q3 quality ex-works and ready for painting
- ▶ Suitable for use on walls, ceilings and facing s

Makes installation faster and easier than ever

COST-EFFECTIVE SOLUTION
FOR GREATER COMFORT

- ▶ No separate corner profile required
- ▶ No joint tape required
- ▶ No need for repeated compound application

Strong joint for strong construction

THE UNIQUE FLEXIBLE
EXPANSION JOINT

- ▶ Reliably absorbs tensile and shearing forces caused by component movement
- ▶ No cracks around the joint
- ▶ Can accommodate slight unevenness in the construction
- ▶ Prefabricated for straight and precise edges
